Portfolio | LinkedIn | GitHub

Career Objective

Aspiring Frontend Developer with hands-on experience in HTML, CSS, JavaScript, Bootstrap, and React.js. Looking to contribute to modern, scalable web applications and enhance my skills in a dynamic and growth-oriented organization.

Education

- B.Tech in E&TC | Bharati Vidyapeeth College of Engineering | 2021 – 2025 | 7.51 CGPA
- HSC – Main Rajaram Jr. College, Kolhapur | 2020 – 2021 | Percentage: 72.67%
- SSC – Sou. Shiladevi Highschool, Kolhapur | 2018 – 2019 | Percentage: 73.00%

Technical Skills

- Programming Languages: HTML, CSS, JavaScript, Bootstrap, React.js
- Tools: Visual Studio Code, Adobe Photoshop
- Version Control: Git & GitHub
- Deployment: Vercel, GitHub Pages
- Languages: English, Hindi, Marathi
- Skilled in Adobe Photoshop with experience in photo editing, poster design, and creative visual work. Proficient in using tools for image enhancement and graphic layout.

Projects

1. **Just-Pizza – A React Pizza Website**

Technologies: React.js, React Router, Bootstrap, CSS, Vite, Web3Forms, Vercel Environment Variables

- Built a responsive multi-page pizza website with Home, About, and Contact pages using React Router for seamless navigation.
- Displayed menu items dynamically on the Home page using a separate data file for scalable and maintainable content management.
- Implemented a working contact form using Web3Forms and secured the access key with Vercel environment variables.
- Designed a clean and user-friendly UI using Bootstrap, custom CSS, and React Icons for an improved user experience.
- https://just-pizza-official.vercel.app/ | Github Repo

2. **Currency Converter**

Technologies: HTML, CSS, JavaScript, API Integration

- Developed a responsive web application to convert between multiple currencies.
- Integrated Frankfurter API for real-time exchange rates and FlagsAPI for country flags.
- Added features like default USD to INR conversion, last updated date, and live deployment using GitHub Pages.
- Live Demo | GitHub Repo

3. **Smart Restaurant Service Robot (Academic Project)**

Technologies: ESP32, IR Sensors, RF Communication, LCD, IoT (ThingSpeak)

- Designed an autonomous delivery robot for contactless food service using line-following logic.
- Integrated keypad-based menu system with LCD display and RF communication for table selection.
- Programmed data logging to ThingSpeak IoT platform using Wi-Fi connectivity

Research & Publication

- Published a research paper titled “Smart Restaurant Service Robot” at NCETET 2025. Focused on robot architecture, ESP32 programming, IR navigation logic, and IoT data logging.
- View Paper (PDF)

Hobbies

Coding, Photography, Cinematography
