Professional Summary

MERN Stack Developer with a strong foundation in JavaScript, React.js, Node.js, Express.js, and MongoDB. Passionate about building responsive full-stack web applications, developing REST APIs, and continuously enhancing my technical skills.

Education

Bachelor of Technology (B.Tech.) – Electronics & Telecommunication Engineering

Bharati Vidyapeeth's College of Engineering, Kolhapur

2021 – 2025 | CGPA: 7.51/10

Technical Skills

Frontend:	HTML, CSS, Bootstrap, JavaScript (ES6+), TypeScript, React.js
Backend:	Node.js, Express.js, REST APIs, CRUD APIs, Authentication (JWT, Session), Authorization, Middleware
Database:	MongoDB, MongoDB Atlas
Tools & Libraries:	Visual Studio Code, React Router, Mongoose, Joi, JWT (JSON Web Token), Bruno
Version Control:	Git & GitHub
Deployment:	Vercel, GitHub Pages
Other:	Adobe Photoshop, Adobe Lightroom
Languages:	English, Hindi, Marathi

Project

Just-Pizza – A Full-Stack Pizza Web Application

Technologies: React.js, React Router, Node.js, Express.js, MongoDB, Mongoose, Joi, JWT, Bootstrap, CSS, Vite

- Developed a responsive full-stack pizza web application using React.js, Node.js, Express.js, and MongoDB with a structured frontend and modular backend architecture.
- Implemented user registration and login functionality with React frontend integration, REST APIs, MongoDB data storage using Mongoose, and JWT-based authentication.
- Organized backend code into separate routes, services, database, models, and middleware modules, with Joi validation and protected user APIs for structured and maintainable development.
- Build a dynamic pizza menu using reusable React components and a separate data file, with responsive UI styling using Bootstrap and custom CSS.
